MissionJEET

Drona JEE 2.0 2027 Batch Planner

Dates	Academics	Physics Chapters	Physics Subtopics	Chemistry Chapters	Chemistry Subtopics	Mathematics Chapters	Maths Subtopics
Thursday, June 4, 2026	Lecture	Basic Mathematics	Algebra				
Friday, June 5, 2026	Lecture					Basic Mathematics	Number System
Saturday, June 6, 2026	Lecture			Some Basic Concepts of Chemistry (Mole Concept)	Introduction, Matter and its Classification, amu,RAM, 1st 30th elements Introduction to Mole, Mole Calculation Using No. of Particles, Molar Mass (Gram Atomic Mass and Gram Molecular Mass), Average Molar Mass, Worked Examples: Mole, Molar Mass, and No. of Particles.		
Monday, June 8, 2026	Lecture	Basic Mathematics	Trigonometry			Basic Mathematics	Number System
Tuesday, June 9, 2026	Lecture	Basic Mathematics	Trigonometry			Basic Mathematics	Wavy Curve Method
Wednesday, June 10, 2026	Lecture					Basic Mathematics	Wavy Curve Method
Thursday, June 11, 2026	Lecture	Basic Mathematics	Coordinate Geometry Binomial Expression			Basic Mathematics	Wavy Curve Method
Friday, June 12, 2026	Lecture	Basic Mathematics	Functions Logarithms				
Saturday, June 13, 2026	Lecture			Some Basic Concepts of Chemistry (Mole Concept)	Basics of Ideal Gas Equation: PV = nRT (Units of Pressure, Volume, Temperature and Their Interconversion). STP/NTP. 'Y-Map,' Worked Examples: Y Map.		
Monday, June 15, 2026	Lecture	Basic Mathematics	Differentiation	Some Basic Concepts of Chemistry (Mole Concept)	Law of Chemical Combination: Conservation of Mass, Law of Constant Proportion, Law of Multiple Proportions, Law of Reciprocal Proportions. Worked Examples: Laws of Chemical Combination.		
Tuesday, June 16, 2026	Lecture	Basic Mathematics	Differentiation	Some Basic Concepts of Chemistry (Mole Concept)	Percentage Composition,Empirical and Molecular formula Determination of Empirical Formula. Worked Examples: Empirical and Molecular Formula.		
Wednesday, June 17, 2026	Lecture	Basic Mathematics	Integration			Basic Mathematics	Wavy Curve Method
Thursday, June 18, 2026	Lecture	Basic Mathematics	Integration			Basic Mathematics	Modulus Functions
Friday, June 19, 2026	Lecture					Basic Mathematics	Modulus Functions
Saturday, June 20, 2026	Lecture			Some Basic Concepts of Chemistry (Mole Concept)	Laws of Chemical Combinations Mole,Vapour density,Atomicity Mole Concept		
Monday, June 22, 2026	Lecture	Vectors	Definition & type of vector, Angle between vectors			Basic Mathematics	Modulus Inequalities
Tuesday, June 23, 2026	Lecture	Vectors	Addition of vectors, including both laws			Basic Mathematics	Modulus Inequalities
Wednesday, June 24, 2026	Lecture	Vectors	Subtraction of vector & question Practice			Basic Mathematics	Logarithms & their Properties
Thursday, June 25, 2026	Lecture	Vectors	Polygon rule of vector addition			Basic Mathematics	Logarithms & their Properties
Friday, June 26, 2026	Lecture	Vectors	Component of vector, definition of unit vector & representation of a vector in form	Some Basic Concepts of Chemistry (Mole Concept)	Molecular Mass,Gram Molecular Mass Average Molecular Mass Formula Mass		
Saturday, June 27, 2026	Lecture			Some Basic Concepts of Chemistry (Mole Concept)	Percentage Composition,Empirical and Molecular formula Mole,Vapour density,Atomicity Mole Concept		

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Sunday, June 28, 2026	**Short Test-1**		**Basic Mathematics (Complete Chapter)**		**Some Basic Concepts of Chemistry (Mole Concept): Introduction, Matter and its Classification, amu,RAM, 1st 30th elements Introduction to Mole, Mole Calculation Using No. of Particles, Molar Mass (Gram Atomic Mass and Gram Molecular Mass), Average Molar Mass, Worked Examples: Mole, Molar Mass, and No. of Particles. Basics of Ideal Gas Equation: PV = nRT (Units of Pressure, Volume, Temperature and Their Interconversion). STP/NTP. 'Y-Map,' Worked Examples: Y Map. Law of Chemical Combination: Conservation of Mass, Law of Constant Proportion, Law of Multiple Proportions, Law of Reciprocal Proportions. Worked Examples: Laws of Chemical Combination. "Percentage Composition,Empirical and Molecular formula Determination of Empirical Formula. Worked Examples: Empirical and Molecular Formula. Laws of Chemical Combinations Mole,Vapour density,Atomicity Mole Concept**		**Basic Mathematics: Number System Number System Wavy Curve Method Modulus Functions Modulus Inequalities**
Monday, June 29, 2026	**Lecture**	**Vectors**	**General representation of a vector in 2-D & 3D, Position**			**Basic Mathematics**	**Logarithms & their Properties**
Tuesday, June 30, 2026	**Lecture**	**Vectors**	**vector,displacement, average velocity**			**Basic Mathematics**	**Logarithmic Equations**
Wednesday, July 1, 2026	**Lecture**	**Vectors**	**Scalar product and its application**			**Basic Mathematics**	**Logarithmic Inequalities**
Thursday, July 2, 2026	**Lecture**	**Vectors**	**Scalar product and its application**			**Basic Mathematics**	**Logarithmic Inequalities**
Friday, July 3, 2026	**Lecture**	**Units and Dimension**	**Introduction**	**Some Basic Concepts of Chemistry (Mole Concept)**	**Y Map, Stoichiometry: Interpretation of Balanced Chemical Equation. Equation-Based Calculation. Worked Examples: Equation-Based Calculation.**		
Saturday, July 4, 2026	**Lecture**			**Some Basic Concepts of Chemistry (Mole Concept)**	**Stoichiometry and Stoichiometric Calculations (Mass–Mass, Mass–Volume and Mole–Mole Analysis). Worked Examples: Stoichiometry.**		
Sunday, July 12, 2026	**JEE Main -1**		**Basic Mathematics (Complete Chapter) Vectors: Definition & type of vector, Angle between vectors Addition of vectors, including both laws Subtraction of vector & question Practice Polygon rule of vector addition Component of vector, definition of unit vector & representation of a vector in form**		**Some Basic Concepts of Chemistry (Mole Concept):** Introduction, Matter and its Classification, amu,RAM, 1st 30th elements Introduction to Mole, Mole Calculation Using No. of Particles, Molar Mass (Gram Atomic Mass and Gram Molecular Mass), Average Molar Mass, Worked Examples: Mole, Molar Mass, and No. of Particles. Basics of Ideal Gas Equation: PV = nRT (Units of Pressure, Volume, Temperature and Their Interconversion). STP/NTP. 'Y-Map,' Worked Examples: Y Map. Law of Chemical Combination: Conservation of Mass, Law of Constant Proportion, Law of Multiple Proportions, Law of Reciprocal Proportions. Worked Examples: Laws of Chemical Combination. Percentage Composition,Empirical and Molecular formula Determination of Empirical Formula. Worked Examples: Empirical and Molecular Formula. Laws of Chemical Combinations Mole,Vapour density,Atomicity Mole Concept Molecular Mass,Gram Molecular Mass Average Molecular Mass Formula Mass Percentage Composition,Empirical and Molecular formula Mole,Vapour density,Atomicity Mole Concept		**Basic Mathematics: Number System Number System Wavy Curve Method Modulus Functions Modulus Inequalities Logarithms & their Properties**
Monday, July 6, 2026	**Lecture**	**Units and Dimension**	**Physical Quantities System of Units**			**Set Theory**	**Types of Sets**
Tuesday, July 7, 2026	**Lecture**	**Units and Dimension**	**Dimensions of Physical Quantities**			**Set Theory**	**Operations on Sets**
Wednesday, July 8, 2026	**Lecture**	**Units and Dimension**	**Dimensional Constants Dimensional Variables**			**Set Theory**	**Algebra of sets**
Thursday, July 9, 2026	**Lecture**	**Units and Dimension**	**Dimensional Analysis and its Applications Application Of Dimension**			**Set Theory**	**Algebra of sets**
Friday, July 10, 2026	**Lecture**	**Motion in a Straight Line**	**Introduction**	**Some Basic Concepts of Chemistry (Mole Concept)**	**Worked Examples on Stoichiometry and Limiting Reagent. How to Find Limiting Reagent and Excess Reagent. Worked Examples: Limiting Reagent. Percentage Yield and Percentage Purity Concept and Its Numericals. Principle of Atomic Conservation (POAC). Concentration Terms & Application Mixture Analysis Concept and Its Numericals, Problems on Sequential Reaction.**		

Mission JEET

Drona JEE 2.0 2027 Batch Planner

Saturday, July 11, 2026	Lecture			Structure of Atom	Introduction Atomic Structure – Discovery of Subatomic Particles.		
Monday, July 13, 2026	Lecture	Motion in a Straight Line	Concept of position, path length (distance), displacement			Set Theory	Geometrical Practical Problems on Union and Intersection of Two Sets
Tuesday, July 14, 2026	Lecture	Motion in a Straight Line	Speed			Set Theory	Geometrical Practical Problems on Union and Intersection of Two Sets
Wednesday, July 15, 2026	Lecture	Motion in a Straight Line	Velocity			Trigonometric Ratios & Identities	Introduction Trigonometric Ratios for Acute Angle Basic identities Sign Convention of the Trigonometric Functions
Thursday, July 16, 2026	Lecture	Motion in a Straight Line	Velocity			Trigonometric Ratios & Identities	Domain/Range of Trigonometric Functions
Friday, July 17, 2026	Lecture	Motion in a Straight Line	Acceleration	Structure of Atom	Atomic Models Some Important Atomic Terms,Nature of Light and Electromagnetic Spectrum,Particle Nature of Electromagnetic Radiation: Planck's Quantum, Application of Planck's Quantum Theory		
Saturday, July 18, 2026	Lecture			Structure of Atom	Photoelectric Effect. Bohr Model (Derivation of Radius, Velocity, Energy (Total, KE, PE) Bohr Model: Energy Level Diagram, Time Period of Revolution, Frequency, Its Drawbacks and Limitations.		
Sunday, July 26, 2026	JEE Main -2		Vectors (Complete Chapter) Units and Dimension (Complete Chapter)		Some Basic Concepts of Chemistry (Mole Concept) (Complete Chapter)		Basic Mathematics (Complete Chapter) Set Theory: Types of Sets Operations on Sets Algebra of sets
Monday, July 20, 2026	Lecture	Motion in a Straight Line	Acceleration			Trigonometric Ratios & Identities	Domain/Range of Trigonometric Functions
Tuesday, July 21, 2026	Lecture	Motion in a Straight Line	Graphs			Trigonometric Ratios & Identities	Allied Angles Sum and Difference Formulae
Wednesday, July 22, 2026	Lecture	Motion in a Straight Line	Graphs			Trigonometric Ratios & Identities	Multiple and Submultiple Angles Trigonometric Ratios of Standard Angles
Thursday, July 23, 2026	Lecture	Motion in a Straight Line	Motion with constant acceleration (uniformly acceleration motion)			Trigonometric Ratios & Identities	Transformation Formulae Identities
Friday, July 24, 2026	Lecture	Motion in a Straight Line	Motion with variable acceleration	Structure of Atom	Definition of Ionization Energy/Potential, Excitation Energy/Potential, Binding/Separation Energy, Spectrum and Its Classification.		
Saturday, July 25, 2026	Lecture			Structure of Atom	Hydrogen Spectrum, Derivation and Application of Rydberg Equation, Number of Spectral Lines Calculations. De Broglie Wavelength, Heisenberg Uncertainty Principle.		
Monday, July 27, 2026	Lecture	Motion in a Straight Line	Motion with variable acceleration			Trigonometric Ratios & Identities	Maximum/Minimum Value Some Series
Tuesday, July 28, 2026	Lecture	Motion in a Plane	Projectile Motion			Trigonometric Ratios & Identities	Maximum/Minimum Value Some Series
Wednesday, July 29, 2026	Lecture	Motion in a Plane	Projectile Motion			Trigonometric Ratios & Identities	Maximum/Minimum Value Some Series
Thursday, July 30, 2026	Lecture	Motion in a Plane	Projectile Motion			Trigonometric Ratios & Identities	Maximum/Minimum Value Some Series
Friday, July 31, 2026	Lecture	Motion in a Plane	Projectile Motion	Structure of Atom	Wave Mechanical Model of Atom (11.1–11.4): Concept of Orbit and Orbital, Wave Function, Schrödinger Equation and Function, Quantum Numbers.		
Saturday, August 1, 2026	Lecture			Structure of Atom	Aufbau Principle, Pauli Principle, Hund's Rule, Electronic Configuration of Atoms and Ions, Exceptions of Aufbau Principle, Magnetic Properties, Magnetic Moment, Orbital Angular Momentum.		
Sunday, August 9, 2026	JEE Advance-1		Basic Mathematics (Complete Chapter) Vectors (Complete Chapter) Units and Dimension (Complete Chapter)		Some Basic Concepts of Chemistry (Mole Concept) (Complete Chapter)		Basic Mathematics (Complete Chapter) Set Theory (Complete Chapter)

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Monday, August 3, 2026	Lecture	Motion in a Plane	Realtive Motion			Trigonometric Ratios & Identities	Maximum/Minimum Value Some Series
Tuesday, August 4, 2026	Lecture	Motion in a Plane	Realtive Motion			Trigonometric Equations	Introduction Solution
Wednesday, August 5, 2026	Lecture	Motion in a Plane	Realtive Motion			Trigonometric Equations	Solution
Thursday, August 6, 2026	Lecture	Motion in a Plane	Rain-River Boat			Trigonometric Equations	Type of Trigonometric Equation
Friday, August 7, 2026	Lecture	Motion in a Plane	Rain-River Boat	Structure of Atom	Radial Probability and Angular Probability Distribution Function, Types of Nodes, Number of Nodes Calculation, Distance of Radial Node from Nucleus, Graphs of r vs r, r^2 vs r, RPDF vs r.		
Saturday, August 8, 2026	Lecture			Classification of Elements and Periodicity in Properties	Need for Classification of Elements,Historical Development of Classification of Elements,Magic Numbers		
Monday, August 10, 2026	Lecture	Motion in a Plane	Rain-River Boat			Trigonometric Equations	Type of Trigonometric Equation
Tuesday, August 11, 2026	Lecture	Laws of Motion	laws & types of force			Trigonometric Equations	Type of Trigonometric Equation
Wednesday, August 12, 2026	Lecture	Laws of Motion	F.B.D. & Application of NLM			Trigonometric Equations	Type of Trigonometric Equation
Thursday, August 13, 2026	Lecture	Laws of Motion	F.B.D. & Application of NLM			Trigonometric Equations	Type of Trigonometric Equation
Friday, August 14, 2026	Lecture	Laws of Motion	Atwood machine (pulley related), two or more blocks in contact	Classification of Elements and Periodicity in Properties	Modern Periodic Law and Present Form of the Periodic Table,Merits of Long Form of Periodic Table Over Mendeleev's Periodic Table		
Sunday, August 23, 2026	JEE Main -3		Motion in a Straight Line (Complete Chapter) Motion in a Plane: Projectile Motion Projectile Motion Realtive Motion Rain-River Boat		Structure of Atom (Complete Chapter)		Trigonometric Ratios & Identities (Complete Chapter)
Monday, August 17, 2026	Lecture	Laws of Motion	Elevator problems & spring problem/simple			Trigonometric Equations	Type of Trigonometric Equation
Tuesday, August 18, 2026	Lecture	Laws of Motion	Cutting of spring			Quadratic Equations	Introduction
Wednesday, August 19, 2026	Lecture	Laws of Motion	pseudo force			Quadratic Equations	Introduction
Thursday, August 20, 2026	Lecture	Laws of Motion	Constraint motion			Quadratic Equations	Common roots
Friday, August 21, 2026	Lecture	Friction	Introduction static & kinetic friction	Classification of Elements and Periodicity in Properties	Electronic Configuration of Elements and The Periodic Table		
Saturday, August 22, 2026	Lecture			Classification of Elements and Periodicity in Properties	Division of Elements into s, p, d and f Blocks, and Their Characteristics Determintaion of period Block and Groups		
Monday, August 24, 2026	Lecture	Friction	Single block horizontal surface & inclined plan			Quadratic Equations	Theory of equation
Tuesday, August 25, 2026	Lecture	Friction	Angle of repose, Net contact force & angle of friction			Quadratic Equations	Graph of ax2+bx+c
Wednesday, August 26, 2026	Lecture			Classification of Elements and Periodicity in Properties	Classification of Elements as Metals, Nonmetals and Metalloids Anomalous Properties of Second Period Elements Diagonal Relationship Bridge Elements Typical Elements Nomenclature of Elements With Atomic Number > 100	Quadratic Equations	Sign of ax2+bx+c
Thursday, August 27, 2026	Lecture			Classification of Elements and Periodicity in Properties	Periodic Properties,Screening Effect,Effective Nuclear Charge	Quadratic Equations	Location of roots
Saturday, August 29, 2026	Lecture	Friction	Two block problems	Classification of Elements and Periodicity in Properties	Periodic Trends in Physical Properties,Periodic Properties		
Sunday, September 6, 2026	JEE Main -4		Motion in a Plane (Complete Chapter) Laws of Motion (Complete Chapter)		Classification of Elements and Periodicity in Properties: Need for Classification of Elements,Historical Development of Classification of Elements,Magic Numbers Modern Periodic Law and Present Form of the Periodic Table,Merits of Long Form of Periodic Table Over Mendeleev's Periodic Table Electronic Configuration of Elements and The Periodic Table Division of Elements into s, p, d and f Blocks, and Their Characteristics Determintaion of period Block and Groups		Trigonometric Equations (Complete Chapter)

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Monday, August 31, 2026	Lecture	Circular Motion	Centripetal Acceleration			Quadratic Equations	Some results
Tuesday, September 1, 2026	Lecture	Circular Motion	Tangential Acceleration			Quadratic Equations	Descartes rule of signs
Wednesday, September 2, 2026	Lecture			Classification of Elements and Periodicity in Properties	Scales of Electronegativity,Factors affecting the magnitude of electronegativity	Sequence and Series	Introduction
Thursday, September 3, 2026	Lecture			Classification of Elements and Periodicity in Properties	Periodicity in Electronegativity Oxides	Sequence and Series	Arithmetic Progression (AP)
Friday, September 4, 2026	Lecture	Circular Motion	Dynamics of Circular Motion	Chemical Bonding and Molecular Structure	Introduction,Ionic or Electrovalent Bond,Lattice Energy		
Saturday, September 5, 2026	Lecture	Circular Motion	Banking of Road Conical pendulum	Chemical Bonding and Molecular Structure	Factors Favouring Ionic Bonding, Properties of Ionic Compounds. Factors Affecting Solubility (Solubility Trend of Alkali Metal and Alkaline Earth Metal Carbonates, Nitrates, Sulphates, Bicarbonates, Hydroxides, Oxides and Halides).		
Monday, September 7, 2026	Lecture	Circular Motion	Banking of Road Conical pendulum			Sequence and Series	Geometric Progression (GP)
Tuesday, September 8, 2026	Lecture	Circular Motion	Banking of Road Conical pendulum			Sequence and Series	Harmonic Progression (HP)
Wednesday, September 9, 2026	Lecture			Chemical Bonding and Molecular Structure	Kössel - Lewis Approach to Chemical Bonding	Sequence and Series	Insertion of means between Two numbers
Thursday, September 10, 2026	Lecture			Chemical Bonding and Molecular Structure	Resonating Structure, Resonance Energy	Sequence and Series	Properties of Means
Friday, September 11, 2026	Lecture	Work, Energy and Power	Work Basics	Chemical Bonding and Molecular Structure	Valence Shell Electron Pair Repulsion (VSEPR) Theory		
Saturday, September 12, 2026	Lecture	Work, Energy and Power	Work Done by Variable Force	Chemical Bonding and Molecular Structure	Valence Bond Theory (VBT)		
Sunday, September 20, 2026	JEE Advance-2		Motion in a Straight Line (Complete Chapter) Motion in a Plane (Complete Chapter) Laws of Motion (Complete Chapter) Friction (Complete Chapter)		Structure of Atom (Complete Chapter) Classification of Elements and Periodicity in Properties (Complete Chapter)		Trigonometric Ratios & Identities (Complete Chapter) Trigonometric Equations (Complete Chapter) Quadratic Equations (Complete Chapter)
Monday, September 14, 2026	Lecture	Work, Energy and Power	Kinetic Energy & Work Energy Theorem			Sequence and Series	Arithmetical Geometric Series (AGS)
Tuesday, September 15, 2026	Lecture	Work, Energy and Power	Potential Energy			Sequence and Series	Summation Method of difference
Wednesday, September 16, 2026	Lecture			Chemical Bonding and Molecular Structure	VSEPR Theory	Sequence and Series	Telescopic series
Thursday, September 17, 2026	Lecture			Chemical Bonding and Molecular Structure	Hybridisation	Relation Function	Introduction
Friday, September 18, 2026	Lecture	Work, Energy and Power	Conservative Forces & Energy	Chemical Bonding and Molecular Structure	Determination of Number of [p(pi) - p(pi)] Bonds		
Saturday, September 19, 2026	Lecture	Work, Energy and Power	Applications of Energy Conservation	Chemical Bonding and Molecular Structure	Dipole Moment Polarisability and Fajan's Rule Polarity of Covalent Bonds		
Monday, September 21, 2026	Lecture	Work, Energy and Power	Power			Relation Function	Cartesian Products of Sets
Tuesday, September 22, 2026	Lecture	Work, Energy and Power	Collisions			Relation Function	Relation
Wednesday, September 23, 2026	Lecture			Chemical Bonding and Molecular Structure	Linear Combination of Atomic Orbitals (LCAO)	Relation Function	Relation
Thursday, September 24, 2026	Lecture			Chemical Bonding and Molecular Structure	Molecular Orbital Theory (MOT)	Relation Function	Functions
Friday, September 25, 2026	Lecture	Work, Energy and Power	Vertical Circular Motion	Chemical Bonding and Molecular Structure	Shapes of the Molecular Orbitals Bond Enthalpy or Bond Dissociation Enthalpy		
Saturday, September 26, 2026	Lecture	Centre of Mass & System of Particles	System of Particles Basics	Chemical Bonding and Molecular Structure	Bond Parameters Hydrogen Bonds,Intermolecular Forces Back Bonding, Bridge bonding		

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Sunday, October 4, 2026	JEE Main -5		Circular Motion (Complete Chapter) Work, Energy and Power: Work Basics Work Done by Variable Force Kinetic Energy & Work Energy Theorem Potential Energy Conservative Forces & Energy Applications of Energy Conservation		Chemical Bonding and Molecular Structure: Introduction,Ionic or Electrovalent Bond,Lattice Energy Factors Favouring Ionic Bonding, Properties of Ionic Compounds. Factors Affecting Solubility (Solubility Trend of Alkali Metal and Alkaline Earth Metal Carbonates, Nitrates, Sulphates, Bicarbonates, Hydroxides, Oxides and Halides). Kössel - Lewis Approach to Chemical Bonding Resonating Structure, Resonance Energy Valence Shell Electron Pair Repulsion (VSEPR) Theory Valence Bond Theory (VBT) VSEPR Theory Hybridisation Determination of Number of [p(pi) - p(pi)] Bonds Dipole Moment Polarisability and Fajan's Rule Polarity of Covalent Bonds		Sequence and Series (Complete Chapter)
Monday, September 28, 2026	Lecture	Centre of Mass & System of Particles	Centre of Mass Basics			Relation Function	Functions
Tuesday, September 29, 2026	Lecture	Centre of Mass & System of Particles	COM Calculation (Discrete System)			Permutations and Combinations	Introduction
Wednesday, September 30, 202	Lecture			Some Basic principles and Techniques (IUPAC Naming)	Tetravalency of carbon: Shapes of Simple molecules - hybridization (s and p): sigma & pi bonds	Permutations and Combinations	Counting
Thursday, October 1, 2026	Lecture			Some Basic principles and Techniques (IUPAC Naming)	Classification of organic compounds based on functional groups: and those containing halogens, oxygen, nitrogen, and sulphur; Homologous series	Permutations and Combinations	Permutation
Saturday, October 3, 2026	Lecture	Centre of Mass & System of Particles	COM of Continuous Body	Some Basic principles and Techniques (IUPAC Naming)	Degree of Carbon, Hydrogen, Alcohol, Amine, Degree of Unsaturation, Functional Group		
Monday, October 5, 2026	Lecture	Centre of Mass & System of Particles	Standard COM Results			Permutations and Combinations	Circular Permutation
Tuesday, October 6, 2026	Lecture	Centre of Mass & System of Particles	COM by Integration			Permutations and Combinations	Combination
Wednesday, October 7, 2026	Lecture			Some Basic principles and Techniques (IUPAC Naming)	IUPAC of Hydrocarbons & Cycloalkanes	Permutations and Combinations	Divisors
Thursday, October 8, 2026	Lecture			Some Basic principles and Techniques (IUPAC Naming)	IUPAC of Functional Group and Polyfunctional Group IUPAC of Aromatic Compound	Permutations and Combinations	Exponent
Friday, October 9, 2026	Lecture	Centre of Mass & System of Particles	Motion of Centre of Mass	Some Basic principles and Techniques (IUPAC Naming)	IUPAC Naming of Bicyclo & Spiro Compounds Common Naming PYQ'S		
Saturday, October 10, 2026	Lecture	Centre of Mass & System of Particles	Momentum of System	State of matter	The Gaseous State		
Sunday, October 18, 2026	JEE Main -6		Work, Energy and Power (Complete Chapter)		Chemical Bonding and Molecular Structure (Complete Chapter) Some Basic principles and Techniques (IUPAC Naming): Tetravalency of carbon: Shapes of Simple molecules - hybridization (s and p): sigma & pi bonds Classification of organic compounds based on functional groups: and those containing halogens, oxygen, nitrogen, and sulphur; Homologous series Degree of Carbon, Hydrogen, Alcohol, Amine, Degree of Unsaturation, Functional Group		Relation Function (Complete Chapter) Permutations and Combinations: Introduction Counting Permutation Circular Permutation
Monday, October 12, 2026	Lecture	Centre of Mass & System of Particles	Impulse			Permutations and Combinations	Division and distribution
Tuesday, October 13, 2026	Lecture	Centre of Mass & System of Particles	Collision Basics			Permutations and Combinations	Derangement
Wednesday, October 14, 2026	Lecture			State of matter	The Gas Laws	Permutations and Combinations	Some rules
Thursday, October 15, 2026	Lecture			State of matter	The Gas Laws,Ideal Gas Equation Dalton's Law of Partial Pressures Graham's Law of Diffusion/effusion	Binomial theorem	Introduction Expansion of (x+a)n
Friday, October 16, 2026	Lecture	Centre of Mass & System of Particles	1D Collision	State of matter	Kinetic Molecular Theory of Gases Kinetic Gas Equation Explanation of Gas Law from Kinetic Theory Kinetic Energy and Molecular Speeds		

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Saturday, October 17, 2026	Lecture	Centre of Mass & System of Particles	Coefficient of Restitution	State of matter	Maxwell-Boltzmann Distribution of Molecular Speeds Behaviour of Real Gases : Deviation from Ideal Gas Behaviour		
Monday, October 19, 2026	Lecture	Centre of Mass & System of Particles	2D Collision			Binomial theorem	General terms Middle terms
Wednesday, October 21, 2026	Lecture			State of matter	Equation of State for Real Gases (Van der Waals Equation) Liquefaction of Gases Eudiometry	Binomial theorem	Numerically greatest term of binomial expansion Form (A +)n
Thursday, October 22, 2026	Lecture			Thermodynamics	Introduction,Basic terms,Classification of system on the basis of nature,State of system	Binomial theorem	Sum of coefficients in binomial expansion
Friday, October 23, 2026	Lecture	Centre of Mass & System of Particles	Advanced COM Applications	Thermodynamics	Types of Properties, Types of Thermodynamic Processes on the Basis of the Way the Processes Are Carried Out.		
Saturday, October 24, 2026	Lecture	Rotational Motion	Rotational Kinematics	Thermodynamics	Work, heat and internal energy,First Law of Thermodynamics Enthalpy Heat Capacity		
Sunday, November 1, 2026	JEE Advance-3		Circular Motion (Complete Chapter) Work, Energy and Power (Complete Chapter)		Chemical Bonding and Molecular Structure (Complete Chapter) Some Basic principles and Techniques (IUPAC Naming) (Complete Chapter)		Sequence and Series (Complete Chapter) Relation Function (Complete Chapter) Permutations and Combinations (Complete Chapter)
Monday, October 26, 2026	Lecture	Rotational Motion	Rotational Kinematics			Binomial theorem	Summation of series
Tuesday, October 27, 2026	Lecture	Rotational Motion	Moment of Inertia			Binomial theorem	Multinomial theorem
Wednesday, October 28, 2026	Lecture			Thermodynamics	Calculation of q, w, ΔU and ΔH in Various Processes. Thermochemistry Enthalpy of a substance Standard state of substance Enthalpy of reaction Factor affecting heat of reaction Laws of Thermochemistry	Binomial theorem	Binomial theorem for any index
Thursday, October 29, 2026	Lecture			Thermodynamics	Enthalpy change for different type of reaction Limitation of 1st law of thermodynamics Spontaneous process Entropy Second law of Thermodynamics Entropy Change of an Ideal Gas.	Binomial theorem	Binomial theorem for any index
Friday, October 30, 2026	Lecture	Rotational Motion	Moment of Inertia	Thermodynamics	Entropy Change of Solids and liquids Upon Heating Entropy Calculation for solid or liquid systems		
Saturday, October 31, 2026	Lecture	Rotational Motion	Moment of Inertia	Thermodynamics	Standard absolute molar entropy Comparing absolute entropies of substance		
Monday, November 2, 2026	Lecture	Rotational Motion	Moment of Inertia			Straight Lines	Introduction Section formula
Tuesday, November 3, 2026	Lecture	Rotational Motion	Torque			Straight Lines	Different Centre of Triangle
Wednesday, November 4, 2026	Lecture			Thermodynamics	Entropy Change (ΔS) of a Chemical Reaction, Gibbs Free Energy.	Straight Lines	Area Locus
Thursday, November 5, 2026	Lecture			Redox Reaction	Introduction	Straight Lines	Straight line Slope
Tuesday, November 10, 2026	Lecture	Rotational Motion	Kinetic Energy			Straight Lines	Standard form of straight line
Thursday, November 12, 2026	Lecture			Redox Reaction	Balancing of Redox Reaction Types of Redox Reaction	Straight Lines	Position of point w.r.t straight line
Friday, November 13, 2026	Lecture	Rotational Motion	Fixed axis rotation	Redox Reaction	Concept of n-Factor. Valency Factor Law of Equivalence		
Saturday, November 14, 2026	Lecture	Rotational Motion	Angular momentum	Chemical Equilibrium	Types of Chemical Reactions, Active Mass, Chemical Equilibrium & Its Characteristics		
Tuesday, November 17, 2026	Lecture	Rotational Motion	Combined rotation and translation			Straight Lines	Angle between two straight lines
Wednesday, November 18, 2026	Lecture			Chemical Equilibrium	Types of Equilibria, Law of Mass Action, Relation Between Kp & Kc, Some General Equilibrium Expressions	Straight Lines	Perpendicular distance Transformation of Axis
Thursday, November 19, 2026	Lecture			Chemical Equilibrium	Factors Affecting Equilibrium Constant and Its Application	Straight Lines	Concurrent lines
Friday, November 20, 2026	Lecture	Rotational Motion	Combined rotation and translation	Chemical Equilibrium	Degree of Dissociation, Mixed Concept Numericals		

Mission JEET

Drona JEE 2.0 2027 Batch Planner

Saturday, November 21, 2026	Lecture	Rotational Motion	Impulsive torque	Chemical Equilibrium	Le Chatelier's Principle & Its Applications Thermodynamics of Equilibrium, Simultaneous Equilibrium		
Sunday, November 22, 2026	JEE Main -7		Rotational Motion: Rotational Kinematics Rotational Kinematics Moment of Inertia Torque Kinetic Energy Fixed axis rotation		Thermodynamics (Complete Chapter) Redox Reaction (Complete Chapter)		Binomial theorem (Complete Chapter) Straight Lines: Introduction Section formula Different Centre of Triangle Area Locus Straight line Slope Standard form of straight line Position of point w.r.t straight line
Monday, November 23, 2026	Lecture	Rotational Motion	Toppling			Straight Lines	Family of lines
Tuesday, November 24, 2026	Lecture	Rotational Motion	Toppling			Straight Lines	Pair Straight Line
Wednesday, November 25, 2026	Lecture			Ionic Equilibrium	Type of electrolytes	Straight Lines	Angle bisector
Thursday, November 26, 2026	Lecture			Ionic Equilibrium	Different theory for acid and base,The autoionization of water	Circles	Introduction General equation
Friday, November 27, 2026	Lecture	Gravitation	Force/Field/Potential/Energy. Variation of g	Ionic Equilibrium	The pH–Scale Ionisation of weak electrolyte		
Saturday, November 28, 2026	Lecture	Gravitation	Force/Field,'PotentiaL Energy, Variation of g	Ionic Equilibrium	Common ion effect and levelling effect		
Monday, November 30, 2026	Lecture	Gravitation	Escape velocity			Circles	Diameter form Parametric form
Tuesday, December 1, 2026	Lecture	Gravitation	circular orbits, Kepler's laws (Brief only statements			Circles	Intercept made on axis Position of point w.r.t circle
Wednesday, December 2, 2026	Lecture			Ionic Equilibrium	pH–Calculation	Circles	Position of straight lines w.r.t circles Tangent
Thursday, December 3, 2026	Lecture			Ionic Equilibrium	Buffer Solution Salt hydrolysis	Circles	Chord of contact Chord of mid point form
Friday, December 4, 2026	Lecture	Gravitation	circular orbits. Kepler's laws (Brief only statements	Ionic Equilibrium	Indicator Acid-base titration Solubility and Solubility product		
Saturday, December 5, 2026	Lecture	Thermal Properties of Matter	Thermal Expansion	Some Basic principles and Techniques (Isomerism)	Isomerism & Type of Isomerism Classification and Structural Isomerism (Chain and Position)		
Sunday, December 6, 2026	JEE Main -8		Rotational Motion (Complete Chapter) Gravitation: Force/Field,'PotentiaL Energy, Variation of g Escape velocity		Chemical Equilibrium (Complete Chapter) Ionic Equilibrium: Type of electrolytes Different theory for acid and base,The autoionization of water The pH–Scale Ionisation of weak electrolyte Common ion effect and levelling effect		Straight Lines (Complete Chapter)
Monday, December 7, 2026	Lecture	Thermal Properties of Matter	Thermal Expansion			Circles	Position of two Circles
Tuesday, December 8, 2026	Lecture	Thermal Properties of Matter	calorimetry			Circles	Position of two circles (touching, intersecting, separate)
Wednesday, December 9, 2026	Lecture			Some Basic principles and Techniques (Isomerism)	Structural Isomerism (Metamers,Functional)	Circles	Circle circumscribing a triangle
Thursday, December 10, 2026	Lecture			Some Basic principles and Techniques (Isomerism)	Tautomerism	Conic Sections: Parabola	Introduction Standard form Parametric form Types of parabola
Friday, December 11, 2026	Lecture	Thermal Properties of Matter	calorimetry	Some Basic principles and Techniques (Isomerism)	Calculation of Structural Isomerism-1		
Saturday, December 12, 2026	Lecture	Thermal Properties of Matter	Heat Transfer	Some Basic principles and Techniques (Isomerism)	Calculation of Structural Isomerism-2		
Monday, December 14, 2026	Lecture	Thermal Properties of Matter	(Conduction)			Conic Sections: Parabola	General equation Focal distance
Tuesday, December 15, 2026	Lecture	Thermal Properties of Matter	Heat Transfer			Conic Sections: Parabola	Some result

Mission JEET

Drona JEE 2.0 2027 Batch Planner

Wednesday, December 16, 2026	Lecture			Some Basic principles and Techniques (Isomerism)	Geometrical isomerism & Exhibition	Conic Sections: Parabola	Position of point w.r.t. parabola Position of straight lines w.r.t parabola
Thursday, December 17, 2026	Lecture			Some Basic principles and Techniques (Isomerism)	Cis trans & physical property Z/E CIP rule	Conic Sections: Parabola	Tangent Normal Properties of Tangent & Normal
Friday, December 18, 2026	Lecture	Thermal Properties of Matter	(Conduction)	Some Basic principles and Techniques (Isomerism)	Special cases of G.I and Calculation of G.I		
Saturday, December 19, 2026	Lecture	Thermal Properties of Matter	Heat Transfer (Radiation)	Some Basic principles and Techniques (Isomerism)	Conformations: Sawhorse and Newman projections (of ethane,butane cyclohexane) Optical isomerism: Basics Polarimeter experiment and Chiral Centre,Stereo Centre PYQ'S		
Sunday, December 20, 2026	JEE Advance-4		Rotational Motion (Complete Chapter) Gravitation (Complete Chapter)		State of matter (Complete Chapter) Thermodynamics (Complete Chapter) Redox Reaction (Complete Chapter) Chemical Equilibrium (Complete Chapter) Ionic Equilibrium (Complete Chapter)		Binomial theorem (Complete Chapter) Straight Lines (Complete Chapter) Circles (Complete Chapter)
Monday, December 21, 2026	Lecture	Thermal Properties of Matter	Heat Transfer (Radiation)			Conic Sections: Parabola	Focal chord Chord of contact
Tuesday, December 22, 2026	Lecture	Mechanical Properties of Solids	Introduction Stress And Strain Hooke'S Law Stress-strain Curve Types of Elasticity Coefficients (Elastic Moduli)			Conic Sections: Parabola	Chord in mid points form Pair of tangents
Wednesday, December 23, 2026	Lecture			Some Basic principles and Techniques (GOC)	Covalent bond fission - Homolytic and heterolytic & Inductive Effect-Basic introduction	Conic Sections: Parabola	Director circle Properties
Thursday, December 24, 2026	Lecture			Some Basic principles and Techniques (GOC)	Positive and negative inductive effect and its application	Conic Sections:Ellipse	Introduction Standard form Auxiliary circle
Saturday, December 26, 2026	Lecture	Mechanical Properties of Solids	Elastic Moduli Types of Elasticity Coefficients (Elastic Moduli) Elastic Moduli	Some Basic principles and Techniques (GOC)	Hyperconjugation Application of Hyperconjugation		
Monday, December 28, 2026	Lecture	Mechanical Properties of Fluids	Applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height			Conic Sections:Ellipse	General equation Another definition Focal distance
Tuesday, December 29, 2026	Lecture	Mechanical Properties of Fluids	Applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height			Conic Sections:Ellipse	Position of point w.r.t. ellipse Position of straight line w.r.t. ellipse
Wednesday, December 30, 2026	Lecture			Some Basic principles and Techniques (GOC)	Resonance (Part-1)	Conic Sections:Ellipse	Tangent Normal
Thursday, December 31, 2026	Lecture			Some Basic principles and Techniques (GOC)	Resonance (Part-2), Stability of resonating Structures	Conic Sections:Ellipse	Equation of chord joining the P(a) and Q(b) Director circle Properties
Saturday, January 2, 2027	Lecture	Mechanical Properties of Fluids	toricelli;s experiment Pascal Law Archimedes Principle	Some Basic principles and Techniques (GOC)	Aromaticity, Annulene		
Sunday, January 3, 2027	JEE-9		Thermal Properties of Matter (Complete Chapter) Mechanical Properties of Solids (Complete Chapter)		Some Basic principles and Techniques (Isomerism) (Complete Chapter) Some Basic principles and Techniques (GOC): Covalent bond fission - Homolytic and heterolytic & Inductive Effect-Basic introduction Positive and negative inductive effect and its application Hyperconjugation Application of Hyperconjugation Resonance (Part-1)		Conic Sections:Parabola (Complete Chapter)

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Monday, January 4, 2027	Lecture	Mechanical Properties of Fluids	applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height			Conic Sections:Ellipse	Director circle Properties
Tuesday, January 5, 2027	Lecture	Mechanical Properties of Fluids	variation of pressure inside liquid in accelerated containers			Conic Sections: Hyperbola	Introduction Standard form Auxiliary circle General equation Another definition
Wednesday, January 6, 2027	Lecture			Some Basic principles and Techniques (GOC)	Mesomeric Effect Stability of Intermediates, Bond Length and Bond Strength	Conic Sections: Hyperbola	Focal distance Position of point w.r.t. hyperbola Position of straight lines w.r.t. hyperbola
Thursday, January 7, 2027	Lecture			Some Basic principles and Techniques (GOC)	Acidic Strength Basic Strength	Conic Sections: Hyperbola	Tangent Normal Properties Related to Tangent & normal Chord of contact Chord in mid point form Pair of tangents
Friday, January 8, 2027	Lecture	Mechanical Properties of Fluids	shape of free surface of liquid present in rotating container	Some Basic principles and Techniques (GOC)	Tautomerism (Enol Content) electrophiles, and nucleophiles & Type of reactions Substitution, addition, elimination, and rearrangement.		
Saturday, January 9, 2027	Lecture	Mechanical Properties of Fluids	torricelli's experiment	Some Basic principles and Techniques (GOC)	Purification Crystallization, sublimation, distillation, differential extraction, and chromatography - principles and their applications.		
Monday, January 11, 2027	Lecture	Mechanical Properties of Fluids	Pascal Law			Conic Sections: Hyperbola	Director circle Asymptotes Rectangular hyperbola Properties
Tuesday, January 12, 2027	Lecture	Mechanical Properties of Fluids	Archimedes Principle			Complex Number	Introduction, Complex Numbers
Wednesday, January 13, 2027	Lecture			Some Basic principles and Techniques (GOC)	Qualitative analysis	Complex Number	Algebraic operations
Friday, January 15, 2027	Lecture	Mechanical Properties of Fluids	Streamline Flow	Some Basic principles and Techniques (GOC)	PYQ'S		
Saturday, January 16, 2027	Lecture	Mechanical Properties of Fluids	Bernoulli's Principle(Applications Of Bernoulli's Theorem) SURFACE TENSION	Hydrocarbon	Method of Preparation of Alkane		
Sunday, January 17, 2027	JEE-10		Mechanical Properties of Fluids: Applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height Applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height toricelli;s experiment Pascal Law Archimedes Principle applications Of Elastic Behaviour Of Materials, Introduction, Pressure, Variation of pressure with height variation of pressure inside liquid in accelerated containers shape of free surface of liquid present in rotating container torricelli's experiment		Some Basic principles and Techniques (GOC): Covalent bond fission - Homolytic and heterolytic & Inductive Effect-Basic introduction Positive and negative inductive effect and its application Hyperconjugation Application of Hyperconjugation Resonance (Part-1) Resonance (Part-2), Stability of resonating Structures Aromaticity, Annulene Mesomeric Effect Stability of Intermediates, Bond Length and Bond Strength" Acidic Strength Basic Strength Tautomerism (Enol Content) electrophiles, and nucleophiles & Type of reactions Substitution, addition, elimination, and rearrangement. Purification Crystallization, sublimation, distillation, differential extraction, and chromatography - principles and their applications.		Conic Sections:Ellipse (Complete Chapter) Conic Sections:Hyperbola (Complete Chapter)
Monday, January 18, 2027	Lecture	Thermodynamics	Thermodynamic System	Hydrocarbon	Chemical Properties of Alkane : Mechanism of halogenation of alkanes, Physical Properties of Alkane	Complex Number	Argand Plane or complex plane
Tuesday, January 19, 2027	Lecture	Thermodynamics	Reversible and irreversible Process	Hydrocarbon	Method of Preparation of Alkene (Part-1) Method of Preparation of Alkene (Part-2), Mechanism of electrophilic addition: addition of hydrogen, halogens	Complex Number	Conjugate of Complex
Wednesday, January 20, 2027	Lecture	Thermodynamics	First Law of Thermodynamics Second Law of Thermodynamics	Hydrocarbon	Mechanism of electrophilic addition: Water, hydrogen halides (Markownikoff's and peroxide effect)	Complex Number	Modulus of complex no
Thursday, January 21, 2027	Lecture	Thermodynamics	First Law of Thermodynamics Second Law of Thermodynamics	Hydrocarbon	Ozonolysis and polymerization.	Complex Number	Argument of Complex numbers
Friday, January 22, 2027	Lecture	Thermodynamics	First Law of Thermodynamics Second Law of Thermodynamics	Hydrocarbon	Method of Preparation of Alkyne	Complex Number	Form of complex numbers
Saturday, January 23, 2027	Lecture	Thermodynamics	First Law of Thermodynamics Second Law of Thermodynamics	Hydrocarbon	Chemical Properties of Alkyne : Acidic character: Addition of hydrogen, halogens, water, and hydrogen halides: Polymerization.	Complex Number	De moivre's theorem

MissionJEET

Drona JEE 2.0 2027 Batch Planner

Monday, January 25, 2027	Lecture	Oscillations	Definitions	Hydrocarbon	MOP of benzene - Properties of Benzene Mechanism of electrophilic substitution: halogenation, nitration. Friedel - Crafts alkylation and acylation, directive influence of the functional group in mono substituted benzene. PYQs	Complex Number	Cube roots of unity nth root of unity
Wednesday, January 27, 2027	Lecture	Oscillations	Equation of S.H.M. & Introduction of Planar	Purification and Analysis of Organic Compound	Methods of Purification of Organic Compounds Qualitative Analysis of Organic Compounds Detection of Other Elements Quantitative Analysis Estimatiom Of Carbon and Hydrogen Nitrogen Halogens Sulphur Phosphorus Oxygen	Complex Number	Geometry of complex
Thursday, January 28, 2027	Lecture	Oscillations	Energy in S.H.M. & Application of planar	Environmental Chemistry	Introduction Environmental Pollution, Atmospheric Pollution Tropospheric Pollution Acid rain Particulate Pollutants Smog	Limits and Derivatives	Introduction Limit
Friday, January 29, 2027	Lecture	Oscillations	Dynamics of S.H.M. & find time period	Environmental Chemistry	Stratospheric Pollution Water pollution International Standards for Drinking Water Soil pollution Industrial waste Strategies to control environmental pollution Green chemistry Green Chemistry in day-to-day Life	Limits and Derivatives	Derivative
Saturday, January 30, 2027	Lecture	Oscillations	Spring block system & incomplete S.H.M	P-block Elements (Group 13 and 14)	Group 13 elements Physical Properties	Statistics	Introduction Variable (Variate) Relative and cumulative frequency
Sunday, January 31, 2027	JEE Advance-5		Thermal Properties of Matter (Complete Chapter) Mechanical Properties of Solids (Complete Chapter) Mechanical Properties of Fluids (Complete Chapter) Thermodynamics (Complete Chapter)		Some Basic principles and Techniques (Isomerism) (Complete Chapter) Some Basic principles and Techniques (GOC) (Complete Chapter)		Conic Sections:Parabola (Complete Chapter) Conic Sections:Ellipse (Complete Chapter) Conic Sections:Hyperbola (Complete Chapter)
Monday, February 1, 2027	Lecture	Oscillations	Simple pendulum & Compound pendulum	P-block Elements (Group 13 and 14)	Chemical Properties Important trends and anomalous properties of boron Some important compounds of boron	Statistics	Mean Median
Tuesday, February 2, 2027	Lecture	Oscillations	Torsional pendulum & Coupled oscillation	P-block Elements (Group 13 and 14)	Uses of boron and aluminium and their compounds Group 14 elements Physical Properties of Group 14	Statistics	Mode Relation among mean median and mode Measure of Dispersion Variance
Wednesday, February 3, 2027	Lecture	Waves	Travelling Waves	P-block Elements (Group 13 and 14)	Chemical Properties Important trends and anomalous behaviour of carbon	Probability	Introduction Event
Thursday, February 4, 2027	Lecture	Waves	Wave function	P-block Elements (Group 13 and 14)	Allotropes of carbon Uses of Carbon Some important compounds of carbon and silicon	Probability	Types of events Algebra of events Complementary event
Friday, February 5, 2027	Lecture	Waves	Superposition and interference	S-block Element	Group 1 Elements Physical Properties of Group 1 Elements Chemical Properties of Group 1 Elements Uses of Group 1 elements	Probability	Mutually exclusive event Exhaustive event Axiomatic approach to probability Variance
Saturday, February 6, 2027	Lecture	Waves	Superposition & Reflection	S-block Element	General characteristics of the compounds of the alkali metals Anomalous properties of lithium	Introduction to Three Dimensional Geometry	Introduction Coordinate Axes and coordinate plane Coordinate of point is space Distance between two points Section Formula
Monday, February 8, 2027	Lecture	Waves	Standing Waves	S-block Element	Some important compounds of sodium Biological importance of sodium and potassium Group 2 elements Physical properties of group 2 elements	Linear Inequalities	Introduction, Basic Concepts & Terminologies Solving Linear Inequalities in One Variable Solving Linear Inequalities in Two Variables Graphical Method & Shaded Regions Word Problems & Real-life Application

Mission JEET

Drona JEE 2.0 2027 Batch Planner

Tuesday, February 9, 2027	Lecture	Waves	Standing Waves	Hydrogen and its Compound	Position of Hydrogen in the Periodic Table Hydrogen Isotopes of Hydrogen Preparation of Dihydrogen, H2	Solution of Triangle	Introduction Sine rule Cosine rule Projection Formulae Napier's Analogy Auxiliary formulas
Wednesday, February 10, 2027	Lecture	Errors and Measurements	Vernier Calliper Screw gauge	Hydrogen and its Compound	Physical properties of Dihydrogen Chemical properties of Dihydrogen Uses of Dihydrogen Hydrides Water & Permanent Hardness	Solution of Triangle	Area of triangle Centres of Triangle Regular Polygon Solution of Triangle Excentral triangle Some Results
Sunday, February 14, 2027	JEE-11		Oscillations (Complete Chapter) Waves: Travelling Waves Wave function Superposition and interference Superposition & Reflection		Hydrocarbon (Complete Chapter) P-block Elements (Group 13 and 14) (Complete Chapter)		Complex Number (Complete Chapter) Limits and Derivatives (Complete Chapter) Statistics (Complete Chapter) Probability (Complete Chapter) Introduction to Three Dimensional Geometry (Complete Chapter)
